

Date: Sunday 18th September / Session Time: Sun 9am – 4:30 pm

Would you like to learn about or revisit Meridian Therapy?

How would your practice change if you could have a direct dialogue with the patient's body to identify underlying dysfunction? Understanding the meridian system increases one's ability to understand dysfunction that causes symptoms when there is no obvious pathologic process to diagnose. A practitioner unaware of the meridian system misses much that gives clues to understanding health problems.

Due to popular demand, Dr Stephen Sassinis-Shashyan will be presenting a ONE DAY seminar covering Meridian Therapy. He will be combining both theory and hands on practice to allow you to gain confidence in using these tools in your clinics.

I know that Meridian Therapy has been a favourite area for Dr Stephen to both practice and teach. He brings a passion to the subject that allows you to learn the principles and start practicing Meridian Therapy with confidence.

Dr. Tracey Lademann

Dr Stephen has 15 years of experience practicing as a chiropractor and Applied Kinesiologist. He has completed further study in many chiropractic techniques, paediatrics and has a passion for Chinese medicine and it's philosophy. He has a clinical interest in paediatrics and in understanding and developing emotional procedures within the AK paradigm. In 2013, Dr Stephen passed the ICAK Diplomate Board Exams and began teaching for ICAK Australiasia.
